Overview

I hold a Master's Degree in Space Physics (Cum Laude) and have 3.5 years of experience as a Data Scientist at Matogen Applied Insights. I developed solutions such as a Portfolio Performance Monitor, a Credit Loss Model for a telecommunications company, and a PowerBI dashboard for monitoring agricultural nutrient distributions.

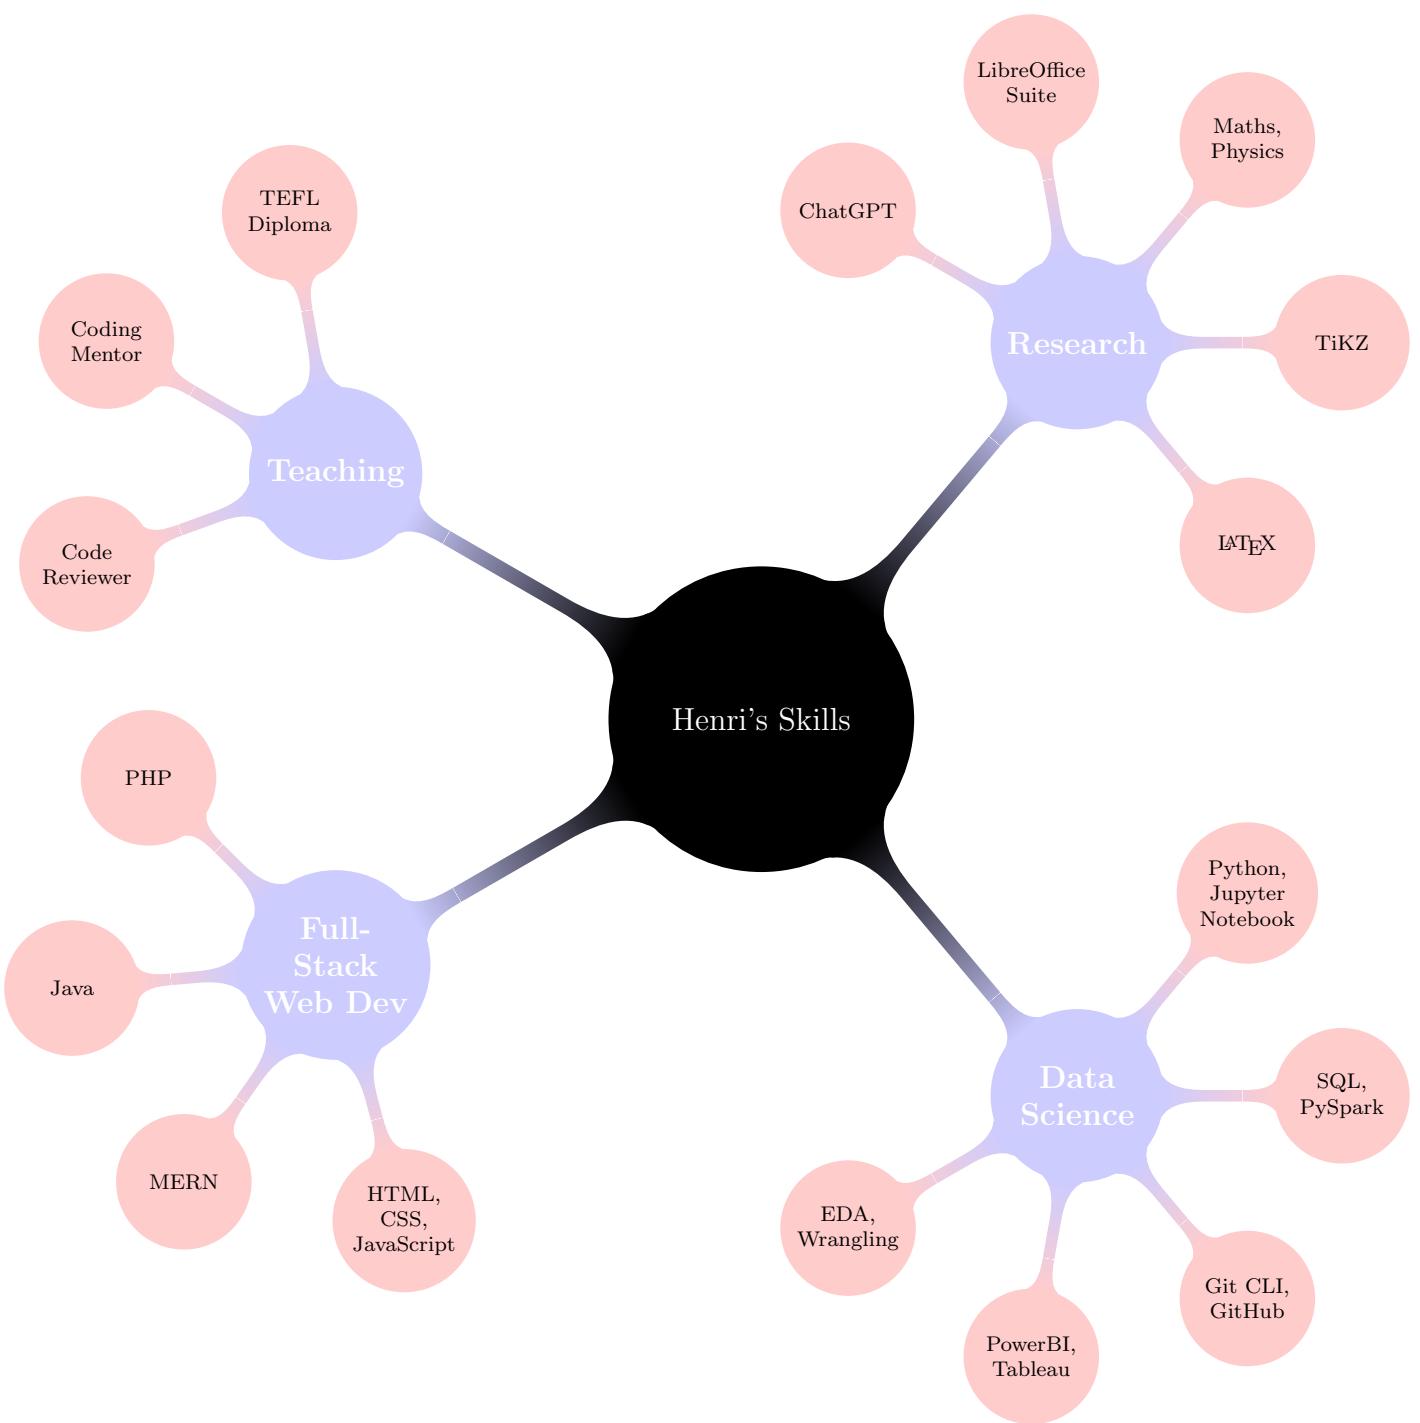

To broaden my skill set, I completed a HyperionDev Bootcamp, mastering HTML, CSS, JavaScript, the MERN stack, and Java. This expanded my expertise in full-stack web development and database management. I later served as a Coding Mentor (July 2024 - January 2025).

Languages

- Afrikaans: Mother Tongue
- English: Fluent, Level 5 TEFL Certification

Education and Training

2024/07–2025/03	HyperionDev Code Reviewer & Mentor <ul style="list-style-type: none">• Evaluated coding submissions, provided feedback, and conducted live sessions.• Refactored task contents for course syllabi.• Conducted onboarding sessions for new students.
