Subject: Application for Software Developer (Remote) Position

Dear Hiring Manager,

I am excited to apply for the Software Developer (Remote) position at Datatex. With a background in full-stack web development & 3.5 years of experience in Data Science, I am eager to contribute my skills to your experienced team while growing into a senior development role.

My technical foundation stems from an MSc in Space Physics (Cum Laude), where I developed strong analytical and problem-solving skills. Transitioning from academia, I spent over three years as a Data Scientist at Matogen Applied Insights, where I built AI-driven models, web-based dashboards, and database-backed applications. To expand my software development expertise, I completed the HyperionDev Full-Stack Bootcamp, honing my skills in JavaScript, HTML5, CSS, and database management.

In line with Datatex's tech stack and development focus, my experience includes:

- **Web Technologies:** Proficiency in JavaScript, HTML5, CSS, and SQL.
- **Low-Level & Backend Development:** Experience in Python, Java, and Linux command-line scripting.
- **Version Control & Collaboration:** Skilled in Git and GitHub.
- **Debugging & Optimization:** Ability to troubleshoot complex software issues and improve system performance.

👉 Check out my [Expense Tracking App](#), which is an app I built using a JavaScript Framework 👉

I have a well-equipped home office with a stable +30Mbps fiber internet connection and backup inverter to ensure uninterrupted remote work. Additionally, I am comfortable participating in virtual team meetings, including the compulsory calls on Tuesdays and Thursdays. Lastly, my expected CTC is approximately R22,000 p/m.

I would welcome the opportunity to discuss how my skills align with the role. Enclosed is my résumé for your review. Please let me know a convenient time to speak further.

Best regards,

Henri Branken
