OPEN TO WORK

Seeking a Web Development role focused on practical, user-facing full-stack applications.

OVERVIEW

I am seeking a new role in Web Development, where I can build practical, user-focused applications and continue growing as a full-stack developer. To strengthen this path, I completed the HyperionDev Full Stack Web & Software Engineer bootcamp, working with HTML, CSS, JavaScript, the MERN stack, and Java, and later served as a HyperionDev Coding Mentor (July 2024–March 2025).

My background also gives me a strong data and mathematics edge. I hold an MSc in Space Physics (*cum laude*), which developed my research training, mathematical modeling ability, and scientific problem-solving skills. I subsequently spent approximately 3.5 years as a Data Scientist at Matogen Applied Insights, delivering client-facing analytics, predictive models, and business-intelligence dashboards.

I currently lecture IT modules at Eduvos (Potchefstroom Campus), which keeps me close to software-development fundamentals, curriculum refinement, and continual learning. I am drawn to full-stack development because it combines clean interfaces, robust back-end logic, and analytical thinking. While fluent in Windows environments, I also work extensively in open-source ecosystems, particularly Linux 🐧

TECHNICAL SKILLS

Frontend: HTML, CSS, SCSS, JavaScript, React, SvelteKit
Backend: Node.js, Express, REST APIs, Java, SQL
Data: Python, Pandas, NumPy, SciPy, Power BI, Tableau, PySpark
Tools: Git, GitHub, Linux, Bash, $\LaTeX$, Jupyter Notebook

SELECTED PROJECTS

FrontEnd Demo 🐧 React, Express, and SCSS demo showcasing component-based UI development, responsive styling, and API-backed application structure.

Expense Tracking App 🐧 Full-stack SvelteKit application for tracking expenses, with a practical data model and user-focused workflow.

EXPERIENCE

2025/04–Current	Eduvos IT Lecturer, Potchefstroom Campus Lectured undergraduate IT modules spanning Web Development and E-Commerce, Object-Oriented Systems Analysis and Design, Python scientific computing, data structures and algorithms, machine learning, Power BI analytics, information systems, computer literacy, and applied mathematics for computing and robotics.
2024/07–2025/03	HyperionDev Code Reviewer & Student Mentor.

	- As a Coding Mentor, I evaluated students' coding submissions for tasks and provided constructive feedback to enhance the quality, efficiency, and styling of their code. Additionally, I conducted live sessions to provide personalised guidance, helping students effectively tackle specific tasks and develop their programming skills. - Acted as an SME to refactor Task Contents for the course syllabus. - Conducted an onboarding session for newly-enrolled students on the LiveStorm platform. - Please see my full Academic Portfolio here.
2019–2022/07	Data Scientist at Matogen Applied Insights. - Created Power BI and Tableau dashboards for crop nutrient monitoring and agent performance tracking. - Built predictive models for grape harvest-date forecasting and telecommunications credit-loss analysis. - Developed a portfolio performance monitor for a telecommunications client using service-line age files and bureau data. - Translated SAS workflows into reusable PySpark libraries to support scalable data processing. - Created a Python irrigation-scheduling algorithm using telemetry readings and weather forecasts. - Analyzed the Nationwide Inpatient Sample (NIS) to identify factors influencing mortality rates in orthopedic-procedure patients.
2017	Internship at the Centre for Space Research, Potchefstroom.
2011	Supplemental Instruction Leader for the 2011 Term in Mathematics (1 st year level).

EDUCATION & TRAINING

2023/01–2023/09	HyperionDev Full Stack Web & Software Engineer Bootcamp (Student). - HyperionDev is accredited with the MICT Seta (ACC/2017/05/0005). This course bears 30 Credits, aligned to an NQF Level 5 Qualification. - Please click on this link to view my entire HyperionDev Profile. - Received a Student of the Month Award for my commitment to excellence and continuous improvement. Selected GitHub repos: <i>Web/UI:</i> [1] Hangman Game, [2] Dictionary App, [8] Monty Hall Game, [9] FrontEnd UI. <i>Full-stack/API:</i> [3] GitHub API App, [4] Credential Management System. <i>Java/Back-end:</i> [5] Delivery App, [6] Project Management System, [7] International Space Station.
2022/08–2022/12	Qualifi Level 5 Diploma in Teaching English as a Foreign Language (The TEFL Academy). Classroom TEFL Course Certificate (20 Hours) - TEFL, Teaching Business English (30 Hours) - The completion of my own Japanese Language Studies book (typeset in L^AT_EX), which took 4+ years. Without a doubt, this is the project I'm most proud of!
2018	- Completed Online Courses at Udemy and DataCamp with a strong focus on Python Data Science and Linux Essentials. - Attended PyConZA 2018 in Johannesburg.
2017	- Completed the “Data Science with Python” Track on DataCamp (Certificate Number #13,897). - Completed the 2017 Advent of Code challenges. My Python solutions may be viewed in this repo.
2014–2016	Master of Science in SPACE PHYSICS, North-West University, Potchefstroom. DISSERTATION: <i>Weighing dark matter in brightest cluster galaxies</i> SUPERVISOR: Prof. Ilani Loubser

AVG. SCORE: 85%, *Cum Laude*

Awarded as the top achiever on Master's level in the Centre for Space Research (for the year 2016).

Academic Transcript

- 2013** | **Honours Bachelor of Science in PHYSICS, North-West University, Potchefstroom.**
AVG. SCORE: 92%, *Cum Laude*
Awarded as the Top Achiever in Honours in Physics.
- 2010–2012** | **Bachelor of Science in PHYSICAL AND CHEMICAL SCIENCES, North-West University, Potchefstroom.**
Majored in **Physics and Applied Mathematics**
3RD YEAR AVG. SCORE: 95%, *Cum Laude*
- Awarded as the top achiever in the 1st, 2nd, and 3rd years of the Physics curriculum.
 - Awarded as the top student in the Faculty of Natural Sciences for the 1st and 3rd years of study.

LANGUAGES

ENGLISH: Fluent, Level 5 TEFL Certification. **AFRIKAANS:** Mother Tongue
